Orofacial Muscle Activities and Pain

Keywords: Pain; Bruxism; Oral behaviors; Dyskinesia; Dystonia

Deadline: 30 September 2026

Dear Colleagues,

The special issue is set to explore the complex relationship between various orofacial muscle activities (e.g., bruxism, oral behaviors, dyskinesia, dystonia) and pain. The importance of this special issue lies in its comprehensive exploration of these conditions and their associations, aiming to enhance our understanding and improve management strategies. By integrating the latest research and clinical insights, it intends to equip health professionals with valuable knowledge on assessment techniques, treatment options, and the underlying pathophysiology of these disorders.

This issue is designed to promote an interdisciplinary approach to patient care, encouraging collaboration among dentists, neurologists, psychologists, and other healthcare providers to develop more effective interventions and enhance patient outcomes. Furthermore, it aims to address the clinical challenges related to orofacial muscle activities and pain, while emphasizing the necessity for ongoing research and innovation in this area. By tackling these critical topics, this special issue seeks to improve pain management and the overall well-being of patients affected by these muscle activities.

Regards,

Frank Lobbezoo, Wendy Knibbe, Merel C. Verhoeff
